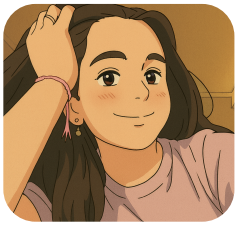
PROVEN IMPACT

My experience doing EOS was really interesting. I learned how to manage my time, I learned how to be more productive, and it taught me a lot about myself too. I now have a tool I can use to help me be more grounded and calm. It was also really fun to get to know different people, and learn and interact with each other.

— AROHI KASHYAPI

Attending the EOS for Teens program was a transformative experience. It gave me clarity on distinguishing between wants and needs, and taught me how to set structured short- and long-term goals. The sessions really helped me explore emotional processing and the importance of inner balance.

— TAVISHI CHATURVEDI



What stood out to me most about EOS was how practical it was. We didn't just talk about ideas — we learned how to plan them out with GAP planning and make them happen using SMART goals. I also picked up some grounding tools that help me reset and stay calm when things get hectic. It's given me both the mindset and the methods to keep moving forward.

— SWASTI KAUSHIK

The EOS for Teens thing was actually super helpful. I figured out how to use GAP planning to break my big goals into smaller stuff I can actually do, and the SMART goals thing made it way easier to stay on track. We also did grounding stuff that I didn't think would work, but now I do it whenever I feel stressed and it actually helps.

— ADYA MATHUR

EOS really helped me get my life a bit more sorted. I learned how to manage my time better so I'm not rushing everything last minute, and the sessions on emotional balance made me realise how much my mood affects my focus. We also did some exercises to figure out what actually matters to me, which made setting goals way easier. Plus, meeting other teens going through the same stuff was really cool.

— VAISHNAVI SHARMA

WHAT WE DON'T DO

1. No toxic positivity
2. Give outdated "just focus" advice
3. No Ignoring the reality of social media & modern life
